DETAILED ACTION

Response to Amendment

The receipt of preliminary amendment of 03/01/04 is acknowledged. Claims 1-6, and 8 have been canceled. Claims 7, 9-22 are pending before the examiner.

Election/Restrictions

- I. Claim 7, drawn to nucleic acid encoding a cyclic peptide, classified in class 435, subclass 91.1.
- II. Claims 9, 10, 11, drawn to a method of inhibiting entry of an HSV into a cell, and a method of treating human infected with an HSV, classified in class 435, subclass 5.
- III. Claims 12-13, drawn to a method of producing acyclic peptide which affects interaction between HSV gD and HSV receptor, classified in class 435, subclass 339.
- IV. Claim 14, drawn to a cyclic peptide, classified in class 530, subclass 300.
- V. Claims 15-17, drawn to a cyclic peptide of BP-1 and fragment thereof and methods of inhibiting binding, classified in class 436, subclass 548.
- VI. Claim 18, drawn to a method of producing a cyclic peptide, classified in class 435, subclass 239.
- VII. Claims 19-22, drawn to various methods of determining whether a test compound affects binding, classified in class 435, subclass 7.91.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-VII are mutually exclusive and patentably distinct products and methods each are structurally and functionally different products and methods that are

Art Unit: 1648

substantially different. The products are made by different methods, and multiple methods have different uses. The examination of all groups would require different searches in the U.S. Patent Shoes, in house and commercial databases, and scientific literature and would require the consideration of different patentability issues.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
